Exemple: with-db (suite)

```
(defmacro with-db (db &body body)
  (let ((temp (gensym)))
    `(let ((,temp *db*))
       (unwind-protect
         (progn
           (setq *db* ,db)
           (lock *db*)
           ,@body)
         (progn
           (release *db*)
           (setq *db* ,temp))))))
```
