Contexte

Un bloc + variables locales

```
* (let ((len (length *features*))
        (fun (complement #'<)))
    (funcall fun len 10))

T
* (let* ((len (length *features*))
         (min (min len 5)))
    (make-array (list min)))

#(0 0 0 0 0)
*
```

la dernière expression est équivalente à :

```
(let ((len (length *features*))
  (let ((min (min len 5)))
    (make-array (list min))))
```
