

# Python Programming - Practice 2 -

Marie Beurton-Aimar

## Loop

**Exercise 1** For these exercises write a version with `for` and with `while` instructions.

- Write a program which ask 10 numbers to the user and display the maximum value.
- Write a program which compute the sum of 10 numbers given by the user.

**Exercise 2**

- Ask to the user to give a number until he gives 0 and display the sum.
- Ast to the user a chain of several letters `ACGT` and tell if the motif `AGT` is included in this chain.
